

Automatic House Foil Roll Rewinding Machine

Automatic house foil roll rewinding machine is used to rewind the aluminum house foil from jumbo roll into baby roll for home use application.

This model is the fully automatic model, designed for six shafts automatic change for very high speed. To Compared with manuel, semi-automatic model, this model is labor saved, much higher production speed for consumer roll, house foil roll. it is user friendly, and very high output.

This model work in latest market demand for house foil roll production with the glue sticking at the end of foil roll, so it does not require a label sticker to attach on the end of roll, it is a way to save the cost, and make the production process much easier.

Production procedurement:

Jumbo roll load--paper core automatic change and clamp--automatic gluing on core, automatic rewinding, automatic stop when reach length---automatic gluing at the end of roll--automatic cut off the ready roll-deliver to ready convey system--join for packing line.

Main Parameters:

Model:PPD-DJ450

Width of jumbo roll:Max450mm

Width of baby roll:Max450mm

Design Speed:Max300m

Jumbo roll diameter:600mm

Baby roll diameter:Max70mm

Core of jumbo roll:3"/6"

Paper core of baby roll:30-40mm

Machine dimension:1700*1350*1000/mm

Gross weight:900KG
